docker-compose.yml (docker run)

```yaml
db:

    image: mysql:5.7

    restart: always

    environment:

      MYSQL_ROOT_PASSWORD: password

  wordpress:

    image: wordpress:latest

    depends_on:

      - db

    ports:

      - "8000:80"
```

docker-compose.yml (docker build)

```
app:
    image: myapp
    build:
        context: ./dir
        dockerfile: Dockerfile
        args:
            - arg1=val1
            - arg2=val2
```
